Technical Skills

Areas of Expertise: Compilers & Programming Languages · Distributed Systems · Machine Learning

Languages: Go · C++ · Python · Racket/Scheme · LLVM · Java · SQL · JavaScript

Cloud: Kubernetes · AWS · GCE · Terraform · LXD · Docker

Workflows & Productivity: Linux · Neovim · VSCode · Copilot · ChatGPT · Git · GH Actions · Obsidian · Toggl · Todoist

API, DB & Misc: REST · gRPC · OpenAPI · FastAPI · DQLite · MongoDB · PostgreSQL · CI/CD · Jenkins

Education

Ph.D., Indiana University, Bloomington , Computer Science, Compilers & Programming Languages	2015 – 2025
Dissertation: Self-Hosting Functional Programming Languages on Meta-Tracing JIT Compilers	
M.Sc., Boğaziçi University , Computer Science, Machine Learning & Natural Language Processing	2012 – 2014
B.Sc., Bilgi University , Computer Science	2005 – 2010

Experience

Canonical USA

REMOTE, US

SWE II (L4 - IC3) · Distributed orchestration at scale

2021 – 2024

- Developed and maintained [Juju](#), an eventually consistent distributed orchestration system used by ~200 companies globally, capable of handling 1000+-node workloads with 99.9% availability on any infrastructure (Kubernetes or otherwise) across various cloud providers (e.g., AWS, GCE). All in Go.
- Improved reliability and fault tolerance by implementing edge machine services on relational DQLite back-end, migrating from NoSQL MongoDB (e.g., [sample PR](#)).
- Owned client libraries for three years—[python-libjuju](#), [Terraform Juju Provider](#); doubled active users and maintained a steady release cadence.
- Took part in roadmap planning, coordinated cross-team work; mentored junior engineers, and improved hiring by creating a structured bootcamp process that cut down onboarding new engineers from 6 months to 1 month.

Indiana University

IN, US

Research Assistant, Course Instructor

2015 – 2021

- Independently took an ambiguous, uncharted compiler problem to a working product; built the first-ever tracing JIT compiler that is a full-scale runtime for a self-hosting, production-grade language. Conducted a full performance investigation and designed new optimization algorithms (see [PhD dissertation](#)).
- Taught data structures & algorithms, compilers, virtual machines, and domain specific languages.

Asseco SEE Group

2010-2012

Software Engineer

- International software company developing virtual payment systems for e-commerce platforms. I developed and delivered 3 virtual point-of-sale projects in 2 years. Used Java, Apache Tomcat, Spring, Mercurial, Jira.

Selected Projects

Pycket: A tracing JIT compiler for full-scale Racket

Developed and maintained [for over five years](#). Designed the compiler to self-host a language on a meta-tracing JIT backend. Contributed designing a new IR (see publications). Built [performance analysis tools](#), run-time optimizations, and [formalisms](#) to improve performance. Implemented code-gen for full FFI layer, and engines with meta-continuations for preemption for green threads. In Python, C, and Racket.

Rax: A full-stack nanopass compiler from Racket to x86_64

Implemented all the passes (e.g., closure conversion, register allocation, code-gen, etc.), along with garbage collection. Developed optimizations, such as inlining, loop-invariant code motion, and proper tail-calls. In Racket, and C.

FARS: Functional Automated Reasoning System

A resolution/refutation theorem prover, for expressions in first-order predicate logic with equality. Used binary paramodulation, and forward and backward subsumption for equational deduction. In Racket.

HazirCevap (Witty): A closed domain question answering system for high school students

Government funded large scale question answering system. M.Sc. thesis on NLP. Led the R&D team (3 faculties, 4 grad students). Developed a Hidden Markov Random Field model for question analysis, and relevance metrics for information retrieval and response generation (see publications). In Python, and JavaScript.

Awards & Scholarships

- Scholarship and award for a project on teaching natural languages to hearing impaired, 2014.
 - Full Scholarship for PhD, 2015-2020
 - Full Scholarship for MSc, 2012
 - Full Scholarship for BSc, 2005-2010
-
